

# Newest Features

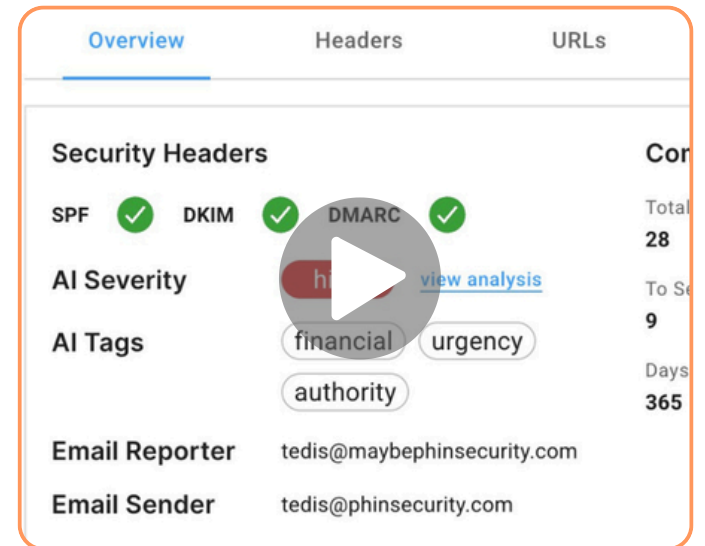

## Phinbox IQ

### What is it?

Triage reported emails faster with all the information you need right in your help desk. Plus, delete malicious emails and block sending domains across all tenants at once.

### How does it benefit you?

- Triage 5x faster, dropping from 15 minutes per email to just 3 minutes
- Reduce escalations by empowering any level of tech to triage
- Reduce average response time for reported email threats

### Administrators

These are admins who can access all companies in your partner.

## Shared Campaigns

### What is it?

You can now create and edit training campaigns for multiple tenants at once.

### How does it benefit you?

- Faster onboarding
- No more time spent manually duplicating the same training for multiple clients
- Maintain consistency across all companies

## Dark Web Monitoring

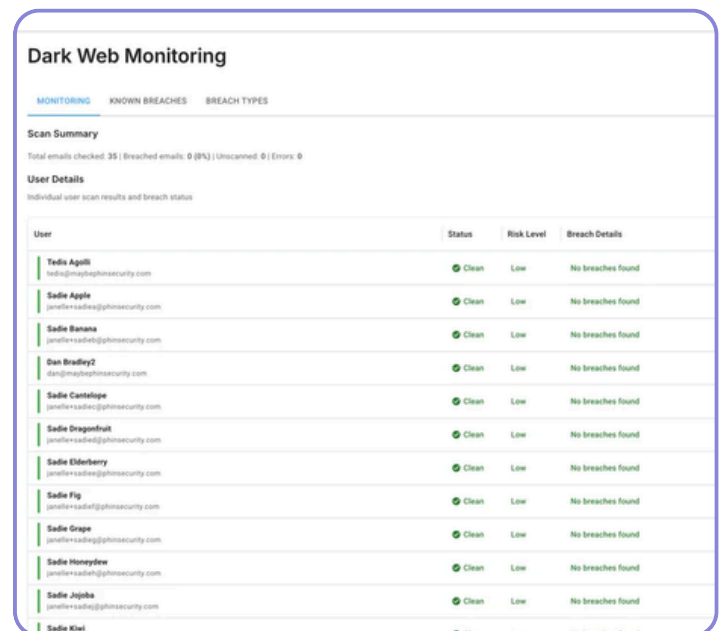

### What is it?

Run a scan at anytime to see if your employees' email addresses have been exposed in a data breach.

### How does it benefit you?

- Find compromised accounts quickly
- Scan all users at once
- Identify the exact information that was exposed
